

Elizabeth Pedley

Software Developer - Chicago, IL

PROJECTS

Multiplayer Game Hub — [GitHub](#)

Group project done at Coding Dojo where we designed and developed a multiplayer game hub using the MEAN stack. A user can face off with another user in a real time memory or tic-tac-toe game.

- Created user login and registration.
- Organized, Outlined and executed the apps data structure.
- Created logic for tic-tac-toe and implemented game with sockets.

Plex Clone — [GitHub](#)

Group project done at Coding Dojo using C# where we created a clone of the Plex app.

- Formulated back-end API endpoints.
- Built out frontend using SASS and JQuery.
- Created dynamic search feature using debouncing.

Snack Ordering System — [GitHub](#)

Group Project done at Coding Dojo using python where we built a snack ordering system that the dojo could use.

- Planned data structure and outlined user flow.
- Built back-end routes for creating and listing snacks.
- Built voting system for snacks.

EXPERIENCE

Freelance Developer

Jan 2016 - Oct 2017

- Built front-end of a website for a local gym.
- Participated in design and user experience meetings.
- Built front-end of an internal reporting app for local company.

Automotive Internet Media - Front-End Developer

April 2015 - Nov 2015

- Implemented responsive design on existing static sites.
- Created custom websites based off designs.
- Took existing sites and implemented custom themes.

Credit Union 1 - Branch Member Service Representative

March 2012 - Jan 2015

- Initiated loans and created credit analysis.
- Opened Accounts and completed transactions for members.
- Trained new employees

BIO

I'm a wife, "dog mom", and an avid programmer. When I started in the industry as a front-end developer, I quickly realized how much I enjoyed the challenge of programming. Due to my desire to learn more, I enrolled in Coding Dojo, where I've spent the last three months learning full-stack development in Python, C#, and MEAN stack. I'm a quick learner, team player, and I have strong leadership skills. With my new knowledge, I'm looking for career opportunities that challenge and me to grow my skills as a developer.

TECHNICAL SKILLS

HTML, CSS, SASS, Javascript, jQuery, Wordpress, Python, Flask, Django, C#, Dapper, Entity, Node, Express, Angular, Socket.io, MySQL, Postgres, MongoDB, Mongoose, Git, Vagrant

SOFT SKILLS

Strong work ethic, Quick learner, Positive attitude, Problem solver, Logical thinker, Teamplayer.

EDUCATION

Coding Dojo - 2018

Udacity Full-Stack Nanodegree - 2018

VOLUNTEER WORK

Humanitarian Relief - Haiti 2017

Kennel Volunteer - AWL 2014-2015

Youth Group Volunteer-SSC 2011-2014

Humanitarian Relief - Kenya 2011

Humanitarian Relief - Kenya 2009
